

Executive National Bank Renovates its Headquarters.

South Florida community bank continues to thrive despite current economic conditions.

Miami, FL June 1, 2009 – At a time when the nation’s largest banks are relying on government funds to relieve the financial strain of toxic assets, some community banks distinguish themselves.

[Executive National Bank](#), a community bank based in South Florida, continues to be a bright spot during the current economic crisis. It followed a strategy and procedures that were once regarded as “too conservative.” In light of the crisis facing major financial institutions however, those procedures are now being widely recognized as sound banking practices. As major banks cope with the consequences of imprudent decision making, Executive National Bank continues to grow.

In December, Executive National Bank began an extensive renovation of its headquarters in Kendall, Florida. The construction project involves updating the bank’s drive-through, offices, and exterior façade. An expansion and update of the bank’s lobby, which will feature paintings by local-artist David Schor, is nearly complete.

“Our goal is to provide customers with ‘Executive Treatment,” said Executive Vice President Sandy Dube Bell. “The new facilities will provide a comfortable environment in which we can continue to offer first-class service.”

The renovation, which has added 1,100 square feet of office space, includes measures to make the thirty-seven year-old building more energy efficient and reduce the bank’s impact on the environment.

Executive National Bank is a privately-owned financial institution that offers a full range of banking services.
